

TSU 220

UHF Reader

The new TSU 220 UHF reader offer best reading performance and up to 7 m range. The robust and compact housing has an integrated antenna and is IP65 / 67 classified, so the reader can be used indoors as well as outdoors.

The circular polarized field reliably identifies transponders, no matter in what position they are mounted on the object. Clearly visible LEDs indicate the status of the reader (yellow, green, red). All connectors are M12 industrial standard connectors that offer the highest quality and waterproof connection for reliable operation of the reader.

The TSU 220 can be used worldwide and is compatible to the following field bus technologies:

- ✓ Compact and robust IP65 / 67 housing
- ✓ Circular field for reliable identification of transponders
- ✓ Clear LED indication
- ✓ High quality industrial standard connectors
- ✓ Can be used worldwide
